

Safety Alert

Multi Tool

KNOW IT

FIND IT

DEAL WITH IT

Issued: December 16, 2019

Issued by: Environment Health & Safety (EH&S)

Category: Safety Incident

Approved for General Use

Description:

Schindler is committed to continuously improving our safety program and culture. As a result of an incident in the industry, we made the decision to eliminate all multi-use (Leatherman) tools from the field.

Incident Analysis Findings:

A technician from another elevator company was using a multi-use tool, like the tool shown below, when he cut / contacted a live electrical source on the car top. The unit he was performing maintenance on was not locked and tagged out.

All Team Members Are Reminded to:

To ensure proper tooling and equipment is used in the field, effective January 1, 2020, all multi-use (Leatherman) tools are banned from all Schindler job sites and company vehicles.

Text Message To Employees:

As a result of an incident in the industry, Schindler has made the decision to eliminate all multi-use (Leatherman) tools from the field.
